Forecast for Wednesday 01 Feb 2023

Weather: Rather cloudy, although some brighter spells are possible in the east. Outbreaks of rain and drizzle are likely through the morning, perhaps some sleet or wet snow on the highest summits. These easing during the afternoon, with cloud breaking and lifting a little, especially in east.

Chance of cloud-free hill tops above 800m: 20% in the west, 60% in the east, lifting to 40% in west and 80% in the east.

Low Cloud and visibility: Periods of cloud obscuring hills above about 600m in the west, but more occasional above 750m in the east. Otherwise good visibility, but falling to several kilometres in rain and drizzle and perhaps a kilometre in any summit sleet or wet snow.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusts could reach 50- 55mph at times over ridges and summits.

Forecast for Thursday 02 Feb 2023

Weather: A mostly cloudy day with occasional rain and drizzle, but mainly light. The best of any brighter spells likely across more eastern hills.

Maximum wind: Westerly 25-30mph, gusts around 50mph, easing a little through the afternoon.

Chance of cloud-free hill tops above 800m: Little chance in west but nearer 40% in east

Low Cloud and visibility: Persistent cloud obscuring hills above 600m, but falling down to 450m at times in the west, mainly in precipitation. Cloud more occasional above 750min the east. Otherwise visibility generally good but falling to several kilometres in rain and drizzle.

Temperature: **Valleys:** Plus 7 Celsius rising to Plus 11 Celsius
At 800m: Plus 5 Celsius
Freezing level: Above the summits
